To Miss C-

When first I saw thy lovely face, Adorn'd with ev'ry flowing grace, Joyful emotions on me press'd, With secret pleasure throbb'd my breast; Erraptur'd, soon I sought thy charms, And was receiv'd with open armsand was received with open arms—
Thy love was all my joy—in fine,
I hop'd, ere long, to make thee mine.
But oh! what deep remove and amart,
What poignant anguish wrung my heart,
When from thy presence I was appured. When from thy presence I was spurn'd, And all thy love to harred surn'd. Now thorns and thistles round me grow, And nought on earth can cheer my woe; Now cares and sorrows on me press, I'm noue'd little—nited less. I'm notic'd little—pitied less.
But I, dear girl, will think on thee,
Tho thou art ever lost to me. Thise iv'ry teeth, thy nectar lips,

Moral and Beligious.

"O! lost to virtue, lost to manly thought, Lost to noble sallies of the soul!
Who think it solitude to be alone."

Cheerless and comfortless must be the life of that rson who dreads to be alone—who prefers the nost frivolous and insipid amusement, to calm and ober reflection. It has been deemed somewha extraordinary that mankind in general know so little of themselves-that every person is more blind to his own failings, than to those of his neighor-this, however, will not be found very remarkable, when it is considered, that most men acek an acquaintance with every body else rather than themselves. We willingly pass an hour in con versation with a neighbor—we accutinize his char-acter and conduct—we notice all his errors, his olemishes, his weaknesses; and we do not hesitate o suggest a mode of reformation. But how seldom do we bestow this trouble on ourselves.-How loth are we to pass even a moment in solitude. How unwilling are we to search into our own hearts. With what reductance do we observe our own frailties and follies; and how slow, how riminally negligent are we in reforming ourselves Man loves himself better than any body else; and yet there is no one whose company he so much treads.

SUNDAY .- What subject is better calculated for contemplation on this day, than the brevity of life, and the uncertainty of every earthly enjoyment? We hold our lives on a precarious tenure, and are liable to instant removal by Him, " ir whom we live, move and have our being"-this bour, dearest connexions and most valuable friends appear in the pride and loveliness of youth-the next, ruffled in a ghastly shroud, the unenvied equipage of death !- Happy the man who can on this day retire within himself, and review those years which are gone forever, with pleasureable satisfaction-this is a luxury which only those who delight in relieving the distrest, pouring wine and oil in the wounded spirit-soothing by kind offices, the pillow of wretchedness and disease, can ever truly feel-and look with exulting confidence "a another and a better world," For that Being who is emphatically styled the "Gop of Love," who delights in acts of beneficence and mercy, will ever reward the individual who considers every child of misfortune his brothes, and who can weep, feelingly weep, over the misfortunes of his fellow man and endeavour, by acts of benevolence and charity, to ameliorate the misfortunes incident to humanity, and wipe away every tear from the eye of misery.

How long must unhappy mortals continue to put on, the weed of mourning, for the loss of friends ?the sable garb and melancholy countenances which continually meet our view in the assemblies of the living, wound the feelings of sympathy, and tell us this mournful truth, that the Grave is the end of all. In vain do we attempt to shun its dark and damp embrace. The infant, ere it can lisp its mother's name, and the sportive child, must die. The youth, flushed with the bloom of spring, and rejoicing in health, suddenly droops, and falls in silence. Middle age dies like corn in summer. Old age is like the ripe and bending corn-has but a short way to dying, speaks the de ease, famine, and the sword-Time's Execution ers-like wolves upon the watch, wait the unhap py victim at every corner, and he escapes one on ly to fall a prey to the other. To the trembling wretch, whose brow is blackened with the consciousness of crime, they come armed with tenfold terrors; but to the man of truth, like indifferent visitors, they are admitted, and he feels nothing but the inevitable blow

MY NEIGHBOUR.

I am a man possessed of a pretty competen fortune, with a wife and several children, and by my industry, taking care to observe a proper midium between extravagance and paraimony, I have dium between extravagance and parsimony, I have been enabled to keep up a respectable and gen-teel appearance. You are to know, I dwell in one of the most pleasant and fashionable parts of the city. Next door to me, on the one side, is a Boarding-House of the first standing, the mistress of which, a middle aged bustling sort of a wo-man, for want of proper management. It know as of which, a middle aged bustling sort of a woman, for want of proper management, (I know not what else,) is continually borrowing something or other, such as spaons, glasses, china, chairs, &c.

—Nor is it only now and then, for if it were I should not complain, but it is repeated almost every day. Oftentimes are we put to the most serious inconvenience by this means—you shall judge. A abort time agn, a servant was dispatched into my house, with Mrs. Botherim's compliments, who requeated the loan of a number of wine glasses, as no many, however, that it left our family with but three, she having had a considerable increase of boarders that day. I was for flatly refusing such an unreasonable demand, but my wife, (who is, without factery, one of the best of "women-kind," and withal of such a gentle disposition as would lend every thing rather than disobling any one,) argued so strongly that I was 'em forced to let' them go with as good a grace as possible. But as ill luck would have it, immediate the most attention. The mournful sound had also attracted the notice of the poor Bride, who, after casting a hasty glance in the direction, shricked and fainted. She was speedily recovered, and the marriage rites concluded—the pageant left the church, while I lingered behind, deeply pondering on the scene I had witnessed, in enquiry at the village, I was informed by fly, Adeiph, the man whose agony I had witnessed, was long a favoured lover of the Bride, but the stern flat of her father had not only forbidden their union, but had solve the most transfer of the bride had not only forbidden their union, but had solve for the Bride, but the stern flat of her father had not only forbidden their union, but had solve for the bride, but the stern flat of her father had not only forbidden their union, but had solve for the Bride, but the stern flat of her father had not only forbidden their union, but had solve for the Bride, but the stern flat of her father had not only forbidden their union, but had solve for the Bride had not

diately after, several friends of mine happened to drop in, and it being nearly our dining hour, I invited them to stay, which they politely agreed to. We sat down—the cloth was removed, and there stood the three glasses full in view—I had hoped that my wife, although it would have been a painful task to her, had sent in to reclaim those which our neighbours had been the reclaim those which our neighbours had been to reclaim those which our neighbours had been those which our neighbours had neighbours had not necessarily neighbours had not necessarily necess a painful task to her, had sent in to rectain the which our neighbour had burrowed—but in this which our neighbour had burrowed but is at table, men our neignmour man norrowed—but in this
was mistaken. There was seven of us at table,
all of course we could not all be supplied from and of course we could not alt be supplied from the few glasses which were remaining—in this di-lemms, a thought suggested itself that some of them might possibly decline drinking—Mr Such-a-one, (said I, mentioning his name.) shall I have a-one, (said i, mentioning his name.) shall I have the pleasure of taking a glass of wine with young great pleasure, thinks I to myself—"Certainly," replied he, and immediately fitted. Hope still cling to me, perhaps the others will not choose any, and all might yet be well—I addressed them generally, wishing by that manogure to escape, "Gentlemen, will none of you take some wine"—but here again I had reason to find fault with Mrs. Botherim, for they all unheaitstimely with Botherim, for they all unhesitatingly with my invitation, and I was compell plied with my invitation, and 1 was compelled to make an apology, by stating the case to them, when they very good humouredly agreed to use tumblers. Now, could any thing be more provoking than this. Metharka I hear some sympathetic souls advising me to remove—to quit an elegant mansion, delightfully situated, on which I have bestowed numberless improvements, for the sake of ridding myself of such a trouble-one acquininance. O tempora! O more! The difficulties attending such a change would counterbalance the benefits I might derive from it.

As I was loth to say any thing to Mrs. Butherim,

As I was toth to say any thing to Mrs. Botherin I could think of no better plan than publishing the which I know above in your entertaining paper, which I she will get a sight of, and must be blind in if she does not apply it to herself

THE VILLAGE BRIDAL.

"The kirk is deck'd at morning tide, The tapers glimmer fair; he Priest and Bridegroom wait the bride, And dame and knight are there."—

The first glance of the morning had tip ed with gold the loftiest trees of the forest, the glittering foliage quivered in the sunbeam, the far off tolling from the perish church hung listlessly on the ear, and all nature appeared sunk in the vacant indolence so peculiar to a summer morning in our " country of the sun."

As I strolled languidly up the little valev, in the bosom of which, hardly discernible from the density of the grove by which it was surrounded, stood the church, sometimes pausing to listen to the melody of the lark, who, perched upon a tree, carroll'd blithely to the rising sun. The notes reverberated along the valley and filled it with music, occasionally interrupted by the melancholy scream of the bittern, who flew far over us bending his solitary course to his mountain home, until the pale fac'd moon, the queen of night, should again resume her empire in the heavens.

The God of the harvest had shed his blessings upon the land, the field groaned beneath the waving grain, and the fruit tree bent under its load.

On entering the church, I conjectured, from the flowers with which the altar was fancifully ornamented, that a marriage was to be solemnized-nor was the idea erroneous, for the party now were approaching.

The Bride, a beautiful young lady of eighteen years, was led by her father to the foot of the altar-A wreath of roses, intermingled with lilies, were entwined in her auburn hair, which lay on her ivory neck in rich ringlets, while the expression of her countenance seemed to mock the splendour of the scene. The pallid hue of care there, and her swoln eye-lids hardly capable of repressing the tears which struggled for a passage. My heart rose to my lips at the sight of the "lamb led to the sacrifice."

At this moment the Bridegroom appeard-his age could not have been under fifty, and his countenance betrayed the existence within him of every passion calculated to chill the warm heart of a susceptible girl. A physiognomist would read legibly engraven there, irritability, avarice, jealousy But he was rich-the lady was in poverty, and her father believed gold to be the only thing essential.

As the venerable priest pronounced the enediction, a convulsive groan from the opposite aisle drew my attention. The person from whom it proceeded, reclined against a pillar, enveloped in a mantle, regarding the ceremony with the most earnest attention. The mournful sound had

Scarcely a twelvemonth had elapsed ere my vagrant disposition led me again to the same village. Again Ceres waved her golden arms o'er the fertile earth, and again the duli lengthened chime from the church summoned me thither. But how differently the peal broke upon the ear-before, it was the tolling of joy and revelry; it was now the knell which ushered a fellow being to the tomb-It was the funeral of the lady whose marriage I had witnessed under the same roof. She had meekly submitted to the commands of her parent, and wedded in his own impotence that will not accord the object of her detestation.—Broken the better feelings of independent minds a rates at hest but little to his advantage. hearted at the loss of her lover, the worm of despair had revelled in her heart, and she gladly hailed the harbinger of dissolution. The coffin rested on the foot of the altar where I had seen her kneelingand her father, writhing under the punishment of his own reflections, leaned against the very pillar which had supported Adolph.

As the coffin was consigned to the earth. door on the opposite side of the building flew open, and a man rushed wildly up the aisle, and gazing convulsively for a moment in the grave, precipitated himself into it. He was taken to the village, and every attention paid him, but in vain-He expired the same evening, and was buried in the grave of his Amelia. It was Adolph.

The specimens of mechanic arts exhibited to the world, have brought forth the humiliating confession from British Reviewers, that in this department America stands rival to England. Under such happy auspices of future renown, why need we heed the four aspersions, foreigners have cast upon it? Sacrificing every jealous idea of our prosperity at the shrine of truth and justice, they represent us, as bur just emerging from a state of barbarism. Prejudiced perhaps, from their infancy against these "rebel proxinces," as they term them, they come out here as faithful chroniclers of our manners and out here as faithful chroniclers of our manners and the seen in their "travels."—We know it to be false; and we are assured that if the productions of Literature and Art meet with suffic nt, Americans will in a short time justify the predictions of its future importance.

A PEEP AT MEXICO.

The following particulars relating to the City of Mexico, are extracted from a letter addressed to a gentleman in Kentucky, by his brother, dated the 8th of January, 1822

"On the 25th of November we arrived at the great city of Mexico, distant from Vera Cruz, about three hundred miles. The main road leading from one of these cities to the other is the best I ever travelled although the country through which it travelled although the country through which it passes is the most mountainous. I ever beheld.—
Mexico is surrounded by mountains, some of which are covered with snow all the year; they afford a grand and splendid prospect from the city, where gardens are covered with flowers and other vegetable productions at all seasons of the year. I have ate ripe peaches in the morning at the foot of a recoveries of in the granting after hearing passed.

This country produces all the fruits of the West Indies, as well as those of North America; the apple comes to great perfection; the watermelon may be had every day in the year, potatoes, and in fact every thing that man can wish for, may be produced here, though the inhabitants live wretch-edly; the city is filled with poor; you are attacked the every corner of the street by beggars—a large at every corner of the street by beggars—a large number of whom are able to work, but have been raised in indolence, and can do nothing except ride or back a mule, which is their only mode of transportation.

I have been informed that at the time Cortez con

I have been informed that at the time Cortex con-quered the city, it contained two hundred thousand inhabitants, and at the commencement of the revo-lution, one hundred and seventy thousand, at this time the population is calculated at one hundred and twenty thousand, two thirds of which are Indians, twenty (nonand, wo increase of mine are indians, the most ignorant, superstiff us and indoient people I have ever seen—they have been priestoridden, and king ridden, until they are neither fit for soldiers, saidors, or citizens. I have frequently visited the old palace of Montexisma, and have been in the room which he filled with gold to purchase peace of the Spaniards. I have likewise seen the large atone that Montezuma and his people wor-shipped—this stone is made to resemble the sun. and is about eight feet in diameter, of solid stone and is about eight feet in diameter, of solid store, on which is carved the figure of all the animals inhabiting this country—it is now put in front of the Cathedral as an ancient ornament. At this time I inhabit a part of the Viceroy's palace: it is a splendid building, and calculated to quarter twenty thousand dragoons: the lower story is all stables and granaries—the second, quarters for the soldiers—the third, offices of the government."

An old eastern tradition says, that while Adam and Eve were in the happy garden, there was sent down to them a present, consisting of twelve baskers fuled with chit char, and that the baskets being emptied, the contents were scattered about the garden. It happened in the mean time that Adam, being rather in a pensive thoughtful mood, paid less attention to this present than his partner did, as that he gathered but only three baskets full, while Eve nimbly collected, and carefully laid away for her use the other nine. The natural comm quence was that the stock of small talk which woman have, is in comparison with that of men, as mae to three.

[ANOTHER LETTER.]

Garrestown, 22d April, 1822.

"Honored Sir—Some time before 4 o'clock this morning, I was informed that a ship was cast away on the rocks at the bottom of your dairy farms, to which place I immediately repaired, and at about the centre of the two farms found a vessel on the rocks, under a very high cliff. At this time, as it blew a dreadful gale, with spring tide and approaching high water, the sea ran mountains high; however, I descended with some men as far down the cliff as the dashing of the sea would permit us the cliff as the dashing of the sea would permit us to go with safety, and there had the horrid specta-cle of viewing five dead bodies stretched on the deck, and four other fellow creatures distractedly deck, and four other relies creatures thatractedly calling for assistance, which we were anable to afford them, as certain death would have attended the attempt to render them any. Of those in this perilous situation, one was a female, whom, though it was impossible from the wind and the roaring it. of the sea to hear her, yet from her gestures, and the stretching out of her hands, we judged to be calling and imploring for our assistance. At this time the greater part of the vessel lay on a rock, and part of the stern, where this poor woman lay, projected over a narrow creek, that divides this rock from another. Here the sea ran over her ock from another. Here the sea ran over her with the greatest fury, yet she kept a firm hold, which it much astomished me that she could do; but we soon perceived that the vessel was broke across, where she projected over the rock, and al-ter many waves dashing against her, this part of the vessel rolled into the waves, and he had the heart-rending misfortune of seeing the woman heart-rending misfortune of seeing the woman perish. The three men lay towards the stern of the vessel, one of whom stuck to a mast, which projected toward the cliff, to whom, after many attempts, we succeeded in throwing a rope, and brought him safe ashore. Another we also saved, but the constant dashing of the waves put an end to the sufferings of the others. This vessel proves to be the Albion packet, of N.York, Capt. Williams, which place she left on the last inst for Liverpool, with a cargo of cotton, raw turpentine, &c. and with about 28 passengers. Her crew consisted of 24; and of the whole, there have been saved only nine, making the sufferers amount to 43. Out of The bedies of five men and two women have been picked up. After doing every thing possible for these poor creatures, I exerted myself with Mr. Gibbons in saving the private property of the poor sailors and passengers, and succeeded in saving some of their trunks. I have brought four of these poor creatures here, Mr. Gibbons has taken three, and two more remain at the dairymen's houses, from whence they were too weak to be removed. Capt Williams is among the sufferers. As I know your feelings towards those thus situated, I have taken the liberty of preparing some thin boards, pletely gone to pieces. She was, I think, as fine a vessel of her description as could be seen. My situation does not allow me say any more at pre-

FROM THE LOYDON COURIER OF APRIL 25.

"City, I o'clock.—We were favoured with the perusal of letters received this morning from St. Petersburgh, dated 1st inst. from Odessa 29th, and from Constantinople the 23d ult. Their contents are of much importance. The negociations continued at Constantinople up to the 2d, with every prospect of an amicable adjustment of the differences. On the 26th of March, the English Consul at Odessa forwarded an important despatch from Lord Strangford to Petersburgh; and on the 23d the merchants at Constantinople were on the 23d the merchants at Constantinople were informed that the Austrian minister had dispatched to forward, and that the post would be sent off at 8 o'clock in the evening, in place of midnight, the usual hour. These letters mention an engage-ment between the Turkish and Greek fleets in Pament between the Turkish and Greek fleets in Patras Bay. The former are, in one account, represented to be completely successful. The Turkish government gave out that the Greek fleet was entirely destroyed; but another letter says only seven vessels were captured out of 71. The engagement was seen by the Hose sloop of war, the officers of which say, the Turkish vessels were fought with great gallantey. There was much bustle at Constantinople in getting vessels fitted out to cope with the Greeks; six sail of the line, seven frigates, and a great number of small vessers frigates, seven figates, and a great number of small vessels, were nearly ready for sea. From St. Petersburgh, the accounts are entirely of a pacific character. The exchange was still rising, and no person expected war. Some insubordination in the Russian army is stated to have taken place; four subjustes are recorded to have taken place; four subjustance provided to have taken place;

We have received this morning German papers to the 17th instant, and copy from the Frankfort Journal the following remarkable article, which appeared in the Austrian Observer of the 12th inst. The Austrian Observer, our readers are probably aware, is considered as the official paper of the Austrian Government, and during the last two or three weeks it has maintained a studied silence upon the subject of the affairs of Turkey and Russia, which has excited the peculiar key and Russia, which has excited the peculiar notice, and called forth the conjectures of conti-nental politicians. At length, however, it speaks out, and in reference to its official character, what it may deserve much consideration, though it is somewhat obscurely delivered. After exposing the machinery of news-making, as practised by our foreign contemporaries, and not wholly unknown, we suspect, to some of our native questions of the delivered state of the state of the delivered state. ration:—" We are formally authorized to declare that the reports which have been circulated for some weeks past in public papers, on the state of the negociations with the Porte, are either entirely fulse, or mixed up with data partly true and partly -

We are still in the same uncertainty respecting the affairs of Turkey. The following are curious details of the grand sitting of the Divan, in which the question was decided:—

The question was to know whether the demands of Russia were admissible of not, after that power had declared that the unreserved accept-ance of its demands would alone be satisfactory. ance of its demands would arone be saturacing.

The Sultan heard the deliberations in this important sitting, concealed behind the curtain of a opening from his cabinet into the council All the great men and Viziers of the Porte then at Constantinople were invited to attend; a similar invitation was sent to the chiefs of the Ja nissaries of the Ulemas. It was reasonably infer-red that the question of peace or war was to be decided. (Here follows a list of many of the great

officers of state, &c. who were present)

The Multi and chiefs of the Ulemas having de clared that several of the demands of the Muscovites were contrary to the principles of Ismalism, and to the dignity of religion, the Grand Vizier, as questions :

Is it just and conformable to the principles of the Holy Koran to raise the standard of the Great Prophet, and call to arms the Mussulmen of the East and of the West, when demands like these indicated are addressed to the Prince of the Faithful?" On which the Mufti said, 'Yes, it is just. These words were immediately repeated by all the These words were immediately repeated by all the Ulemas. The following question was next proposed:—" Is it just and wise to withdraw the Mussulmen from the Principalities of Moldavia and Waltachia, while the Moscovites have assembled on the frontiers a numerous corps, which they will not dissolve?" To which all those present answered unanimously, 'No; that would not be just, it would not be wise,'

The following questions were then discussed:

'Can the administration of the two frontier provinces be entrusted in future, as it has hitherto

Greeka or Boyars ?—The answer was unanimous-ly, 'No, that is impossible.'—'Can we restore to the rebellious Rajahs all their churches and their privileges so long as they obstinately persist in their disobedience to the Bublime Porte?' No, that cannot be.' The Sultan approved of all these dicisions, and gave orders to the Grand Vizier to cause his intentions to be notified by the Reis Ed-scalite the Exercise. PIRACY.

Capt. Thompson, of the sloop Jay, arrived at N York from Gibara, (Cuba) furnishes the following

narrative:

The Jay sailed from New-York on the 19th of Pebruary, bound to Principe. On the 6th of March carried away the head of the foremast, and put into Gibara to repair—proceeded thence on the 21st, and next day at 8 A. M. saw a schr. standing for us, a little to windward of Neuvitas. At 10, who fixed a gun and hoisted Sanish colours—find. she fired a gun and hoisted Spanish colours-find she fried a gun and hosted Spanish colours—highing it impossible to escape, we have to, when she ran along under our quarter, hailed, and ordered me on beard with my papers. I went on board the pirate with two men, when they manned my boat with four men, and sent them on board the Jay, where they ordered the crew into the forecastle, and stood in for the land. The captain of the pirate bearen to question me respective the carron. and stood in order tank. The expecting the cargo, to whom it belonged, &c. but I gave him no direct answer. He said he knew what was on board as well as I did—that he had friends at Gibara, who obtained the information for him—that the cargo belonged to Capt, Driggs, and if he could catch him he would hang him, but he would not hurt us, the cargo being all that he wanted.' At 12, they brought the sloop to anchor inside the reef to the westward of Neuvitas, and hauled their schooner alongside. They then ordered us all into the fore-castle, except the boy, and placed a guard over it. They then commenced loading their schooner with our cargo, threatening the boy if he did not tell where the money and valuables were concealed they would kill him. After loading the schr. which captured us, they hauled another alongside and loaded her also, piling them 4 or 5 feet upon deck. At half past four, the box opened the forecastle and told us the pirates had gone. On coming upon

deck, we saw the two schooners about three qu ters of a mile from us, one towing the other-deck was strewed with broken boxes, soap, tes, &c. They had taken from the cabin all our clothing, beds and bedding, watches, charts, and every thing that was in it, including the vessels papers, log book, &c. torn up the floor and broke most of the furniture. They took most of the cargo from the hold, and broke and injured what they left.

Captain Driggs, of the schooner Abigail, of this port, then lying at Gibara, hearing of the circum-atance of my being captured, immediately fitted out his schooner to go is quest of the pirates, and hired men to go by land and cut off their retreat.

hired men to go by land and cut off their retreat.

On my arrival at Gibara, I had the satisfaction to find that the men who were dispatched by land succeeded in taking them, and that the villains were then in prison. It was also ascertained they were the same who had captured the English schr. Sea Plower, twice, and enbled her in the same manner they did me. On the 17th of April, Capt. Driggs returned to Gibara, in company with the U.S. sehe. Alligator. Capt. Stockton then went the U.S. schr. Alligator. Capt. COMMUNICATION.

GONDURICATION.

Having visited the paintings at the Masonic Balle executed by our native artist, Mr. Street, I would make a few remarks on them, neverally, as they presented themselves. On entering the subly room, we are immediately and foreibly street with his Infuriated Maniac—the light is so managed that he appears in perfect relief from the cunvass, and we are instantaneously attracted to a nearer view of the terrific figure. On a closer approach, the objects of his fury are brought to our view—a person with his arm raised in defence, and a negro, who has been felled to the floor, shrinking from the Maniac, and in his fright seizing the keeper by the leg. These figures are well kept under shadow, so that the principal light falls on keeper by the leg. These figures are well kept under shadow, so that the principal light falls on the Maniac, and on the floor about his feet; which I presume is the cause of the fine relief. It is more easy to conceive than express the effect which this painting had on my mind—it was that of the deepest sympathy.

Next we are attracted to Celadon and Amelia, and delighted with the harmony and soft tints of this picture. It forms a delightful contrast to the Maniae. The figures of Celadon and his Amelia are truly graceful; and very descriptive of the tale,

"As angels look
On dying saints, his eyes compassion shed,

On dying saints, his eyes comp With love illumin'd high-

With love illumin'd highest is the countenance of Celadon. The floating drapery of the figures—the broken limb of the tree—the peculiar position of the howling dog, and the gloomy sky, all indicate a violent storm. This picture is pathetic, and pleasing to contemplate. Haman Accused—Mr. Street's last painting, I shall our aneak of more naticularly, as his former

Haman Accused—Mr. Street's last painting, results now speak of more particularly, as his former pictures are more generally known. The Queen is the most imposing figure in the picture, as the rays of light encircle her whole person. The eye is moderately carried from the Queen to Haman, and then to the King. Queen Esther is at first with a series and sevent a Jewess, and very beautiful—the constume is rich and flowing, and the posture of the extended arm peculiarly graceful. The expression of her features is not clearly defined at first, but after viewing the countenance and figure of Haman—the surprise and indignation of the King's countenance and manner; we should pronounce the triumphant air of the Queen's general appearance judicious. Haman's figure is noble; his position and countenance evince fear and guilt, though we judicious. Imman's notice is noble; his position and countenance evince fear and guilt, though we can trace some vestiges of his former pomp and vanity still easting about the mouth and chin.—The picture is richly coloured and princely, and is, I conceive an homour to its author. in honour to its author.

Nothing extenuate, nor set down aught in malice." Pair and just criticism has ever been considered Far and just criticism has ever been considered as tending much to the improvement of the author, the artist or the actor, and 'tis equally true, that no public entertainment contributes more to rational enjoyment and the formation of taste, than a well regulated theatre. That the Twoli may become of this description is the object of the writer of this communication. There is certainly taken enough in the company to render its performance worthy of public patronage, were it indiciously as worthy of public patronage, were it judiciously a plied; and we may with truth remark, that Mrs. Pelby, Messrs Hutton, Porter, Stone and Simpson, might be considered acquisitions to a theatre of a much higher standing than the Tivoli.

We attended on Monday evening the represen-tation of Virginius, and in submitting to the publis our opinion of the merits of the performance, shall endeavour strictly to follow the rule laid down in

our motor.

Independent of the want of scenery, costume, and decorations, we venture to say the play of Virginius is one of the least calculated to display to advantage the talents of the corps, which we think decidedly comic. Mr Hutton's conception of Virginius was no less vigorous and correct that we were led to expect, from an actor of sound judgment, and although his execution generally was highly respectable, his vociferating powers were too little restrained to delineate with truth the outraged feelings, and heart-rending anguish of the injured, affectionate and dignified Roman Father.

The schr. Eliza, Roberts, arrived at Charlestor on the 22th inst. in 9 days from Havana. The United States' frigate Macedonian, Capt. Biddle. was still at Havana, and had the prize of the Alli-gator as a tender, and with her and the boats of the frigate, gave convoy to all vessels off the coast that desired it. It was reported at Havana, pre-vious to Capt. Robert's sailing, that the Blacks on the South side of the Island were in a state of insurrection.

From Havana,-The schr. F. C. Graf, F. Naghel, master, arrived at N. York on Tuesday morning, in 8 days from Havana. The captain informs that 3 vessels had been plundered by four piratical boats, in the neighbourhood of Havana, one of which was a British brig, loaded with junk beef, and carried to Salt Key, where she was re-captured by the U. 8, schooner Grampus. The Grampus also captured two of the pirates' boats, one of which was burnt, and the other arrived with the schr. at the Havana. The latter boat is now cruizing with the Grampus as a tender.

Several of these piratical boats are schooner rig ged, and carry 20 to 80 men, with a long 2-pounder mounted, and are of about 20 tons burthen. The U.S. frigate Macedonian, British frigate Tribune, and sloop of war Tyne, and a French frigate, were lying at the Havana.

HAVANA, May 9.—Arrived a small piratical schr. about 20 tons, prize to the U. S. schr. Alligator. She was plundering a British brig when taken. FROM THE NORTH AMERICAN REVIEW. A REFLECTION.

I've seen the dark ship proudly braving, With high sail set, and streamers waving, The tempest roar and battle pride;
I've seen those floating streamers shrinking.
The high sail rent, the proud ship sinking,
Beneath the ocean tide;

Beneath the ocean tide;
And heard the seaman farwell sighing,
His body on the dark sea lying,
His death prayer to the wind!
But sadder sight the eye can know,
Than proud bark lost and seaman's wo, Or battle fire and tempest cloud,
Or prey bird's shriek and ocean's shroud—
The shipwarck of the mind!

The editors of the Gazette, announce with plea-sure, the arrival of the Packet ship Amity, captain Maxwell, in 29 days from Liverpool. Our papers from London are to the evening of the 29th ult, and from Liverpool to the 1st inst. From these we copy some further particulars connected with the melancholy loss of the ship Albion, and were it not for the loss of valuable lives, we should feel considerable pleasure in communicating the fact. considerable pleasure in communicating the fact, that considerable property has been saved from the

Much interest was excited in London on the Much interest was excited in London on the 29th ult. by the special meeting called at the Bank of England for the 2d of this month. It was conjectured that that establishment will no longer delay complying with the earnest solicitations of government, and the unanimous call of the country,

the subject of the long talked of war, there

is nothing worthy of notice, except that the pros-pect of such a calamity was daily lessening. The editor of the Courier observes, "We think the general character of what has lately arrived from Vienna. Berlin and Peteraburg, fully justifies us in still cherishing the hope, that Europe will not be exposed to the hazard of an issue which might eventually embroil her in a general war." The London Courier of the 29th, contains the

following highly important fact, as to the expediency of admitting the vessels of Columbia, Bucnos Ayres, and other Independent Countries of South

Ayees, and other independent Countries of South America, to an entry in British ports.

The memorial on this subject, was signed by the first commercial houses in London; and that the application to the Privy Council has been successful, and that it has been notified to the different firms who signed the memorial that:

From the Cork Southern Reporter.

The Albion, whose loss at Garretstown bay we first mentioned in our paper of Tuesday, was one of the finest class of ships between Liverpool and New-York, and was 500 tons burthen. We have New-York, and was 500 tons burthen. We have since learned some further particulars, by which it appears that her loss was attended with circumsuppears that her loss was attended with circumstances of a peculiarly afflicting nature. She had lived out the tremendous gale, of the entire day on sunday, and Capt. Williams consoled his passengers, at 8 o'elock in the evening, with the hope of being able to reach Liverpool on the day but being able to reach Liverpool on the day but one after, which cheering expectation induced almost all the passengers, particularly the females, to re-tire to rest. In some short time, however, the violent squall came on, which, in a moment, carried away the masts, and there being no possibility of disengaging them from the rigging, they as escum-bered the hull that she became unmanageable, and bered the hull that she became unmanageable, and drifted at the mercy of the waves, till the Light Home at the Old Head was discovered, the wreck still nearing in, when the captain told the sad news to the passengers that there was no longer any hope, and acon after she struck. From thence forward all was distress and confusion. The vessel soon went to pieces, and of the crew and passengers, only six of the former and one of the latter were saved.

The mate is among the preserved, and that preservation was already mireculous. He was thrown

on a chil by a case, and had acceeded a clining to the top of it, when another teak him off. He was thrown back again and was more fortunate; but his appearance bespeaks the sufferings he endured from the beating of his body against the rocks. He is dresslithly bruised.

The number of passeagers, we believe, was 25. Of these, as we have already stated, one only was saved, a gentleman of floaton, who traded with Liverpool. He had arrived at New-York almost as the Albion was on the point of salling, and had not time to get hills for a large sum in specie which he had. It was therefore shipped and lost.

Reveral of the bodies have been washed ashore, and Jacob Mark, Esq the American consul at this port, having repaired to the scene where the wreck took place, immediately on learning the melancholy intelligence, has done every thing befitting his situation and a man of humanity under the circumstances. He has provided coffins for the bodies,

stuation and a man of humaniv succer the circum-stances. He has provided coffins for the bodies, and caused them to be interred with their respec-tive names affixed, having first had the mate to point them out, in order that, if the families of any of them should wish hereafter to have the bodies ed, they may be enabled to de a conduct is in every respect most of every thing that has been washed ashore, as we as for accuring any thing that may yet be recove ed. Among the property already found is a box specie; and among the bodies washed ashore that of the French lady; she was extremely heading the bodies. that of the French lady; she was extremely heau-tiful; when first discovered by some respectable persons it was entirely naked. It is mentioned, to us as a fact, which we think ought to be men-tioned, that a country boy, who saw the body, took off his outside coat and covered it; and it is relat-ed of the country people, that they also took off their warm clothing and put them on the unfortu-nate and half perished part of the crew that escap-ed. While there are so many to censure and con-demn their crimes, let them at least, have justice demn their crimes, let them at least, have justice

defin their crimes, let them at least, have justice rendered to their good qualities.

A great number of bids drawn by the British officers to America, on Greenwood & Cox, army agents in London, and on other persons in England, have been also washed ashore Mr. M. It is distressing to be obliged to add to this melancholy event, that on Wednesday, a boat from Coertmasherry, belonging, we learn, to a person of the name of Kingston, in which were eight men, in endeavoing to a save a bisec of the wreck, and

the name of Kingston, in which were eight men, in endeavoring to save a piece of the wreck, and of the eight, seven were drowned. The names of the passengers by the vessel are as follows:

BALM OF COLUMBIA,

An important recent Chemical discovery.

Title ladies and gentlemen of this city and elsewhere, are respectfully informed, that John Oldridge has fortunately discovered, by the power of chemistry, the grand desideratum of preventing Hair from falling off in FORTY-EIGHT HOURS This balm will most absolutely, in the course of a time, make the Hair grow healthy and thick J. O. is well aware that many fraudulent and im-positious Oile, &c, have been imposed on the pub-lic, and therefore projudice will be severe against his discovery, until trial shall convince his patrons his discovery, until trial shall convince his patrons that such a thing exists in nature as a certain preventative against the loss of hair. This valuable balm will cause whiskers and heards to grow rapidly. No danger need be apprehended to the human system by the application of this espillary restorative. The public may rest assured that it helps nature, and is perfectly harmless.

Persona desirous of becoming agents for the sale of the Balm of Columbia, will please address the proprietor by letter, (post paid,) with a suitable reference.
